

Food Truck Documentation

1. General Information

We would like to thank you for purchasing Food Truck! We are very pleased that you choose our theme to build your website. We are doing our best to not disappoint you! Before you get started, please check out these documentation pages. Food Truck can only be used with WordPress and we assume that you already have WordPress installed and ready to go. If you do not, please see [WordPress Codex](http://codex.wordpress.org/Installing_WordPress) (http://codex.wordpress.org/Installing_WordPress) to get started.

1.1 General Overview

Surely you can not wait to start working on your website. And reading documentation is the last what you want at the moment. We prepared a little shortcut for you, with general elements overview – please check it [here](http://createit.support/food-truck-overview/) (<http://createit.support/food-truck-overview/>).

1.2 Requirements for Food Truck

To use Food Truck, you need to meet the following:

- minimum requirements to run WordPress – [here](http://wordpress.org/about/requirements/) (<http://wordpress.org/about/requirements/>) you can find more information – in

case of any doubts regarding the server contact your host provider,

- running the latest version of WordPress, which can be downloaded [here](http://wordpress.org/download/) (<http://wordpress.org/download/>),
- create secure FTP (http://codex.wordpress.org/FTP_Clients) and Database.

1.3 What's Included

When you purchase our theme from Themeforest, you need to download the Food Truck files from your Themeforest account. Navigate to your downloads tab on Themeforest and find Food Truck. Below is a full list of everything that is included when you download the zip and unarchive it, along with a brief description of each item.

Food Truck Folder contains:

- **burger.zip** – main installation folder

1.4 Support

All of our items come with free support, and we have a dedicated support forum to handle your requests. Free support is limited to questions regarding the theme's features or problems with the theme. We provide premium support for code customizations or third-party plugins. If you need help with anything other than minor customizations of your theme then you can contact premium@createit.pl

For free support, follow the steps below

- **Step 1** – [Click Here](http://createit.support/wp-login.php?action=register) (<http://createit.support/wp-login.php?action=register>) to create free forum account, you will need your **Themeforest** purchase code which can only be received after buying the theme from Themeforest.net.

- **Step 2** – You need to enter your Themeforest Purchase Code, e-mail and a password.
- **Step 3** – Once you are signed up, you need to sign into the forum with your new account and you can start using the forum.
- **Step 4** – Find your theme on forum [home page](http://createit.support/) (<http://createit.support/>).
- **Step 5** – Create new issue with button from the right hand side.

Before You Post On Forum

To help speed along your request, we ask you to follow the steps below before posting a new topic on the forum. This is for the benefit of everyone and will help make the entire forum more efficient:

- **Step 1** – Always check the [Documentation](#) and the [Knowledgebase Section](#) (<http://createit.support/knowledgebase/>). Most questions can be answered in those areas
- **Step 2** – Always perform a [Forum Search](#) (<http://createit.support/forums/search>) before you post, its possible your issue has already been brought up and has been answered.
- **Step 3** – If your question has not been brought up, then please post a new topic. Always be as specific as possible. Our form for creating a topic requires that you enter the live URL to your home page or the page that shows the issue in question. The form also has fields for WP and FTP login info. Those fields are not required, however providing us with your login information upfront can save a lot of time for both parties. All login credentials are securely stored and are only accessible by our support staff.
- **Step 4** – We usually answer questions in 24h on working days. However if you don't get any answer in 72h bump up your question or send us a [mail](mailto:support@createit.pl) (<mailto:support@createit.pl>)

Our support hours are 10:00 AM – 6:00 PM UTC + 1 Monday to Friday.

Premium Support

We can create your website from scratch, redesign it or just extend existing ones. For more information, please take a look at [our website](http://outsourcing.createit.pl) (<http://outsourcing.createit.pl>).

Typical issues covered by Premium Support:

- Custom CSS
- Support for third party software and plug-ins
- WordPress Installation with Theme configuration
- Server configuration
- Site structure modifications
- Graphic adjustments, etc
- WordPress general howto's

2. Installation

You can install the theme in two ways: through WordPress, or via FTP. But first, you need to download the Food Truck files from your Themeforest account. Navigate to your downloads tab on Themeforest and find Food Truck. Click the download button.

For more information check also [this article](http://createit.support/knowledgebase/what-is-a-theme-how-install-and-activate-it/) (<http://createit.support/knowledgebase/what-is-a-theme-how-install-and-activate-it/>) from Knowledge Base.

2.1 Installation via Administration Panel

When Food Truck files are downloaded from your Themeforest account. You can start installation using WordPress administration panel.

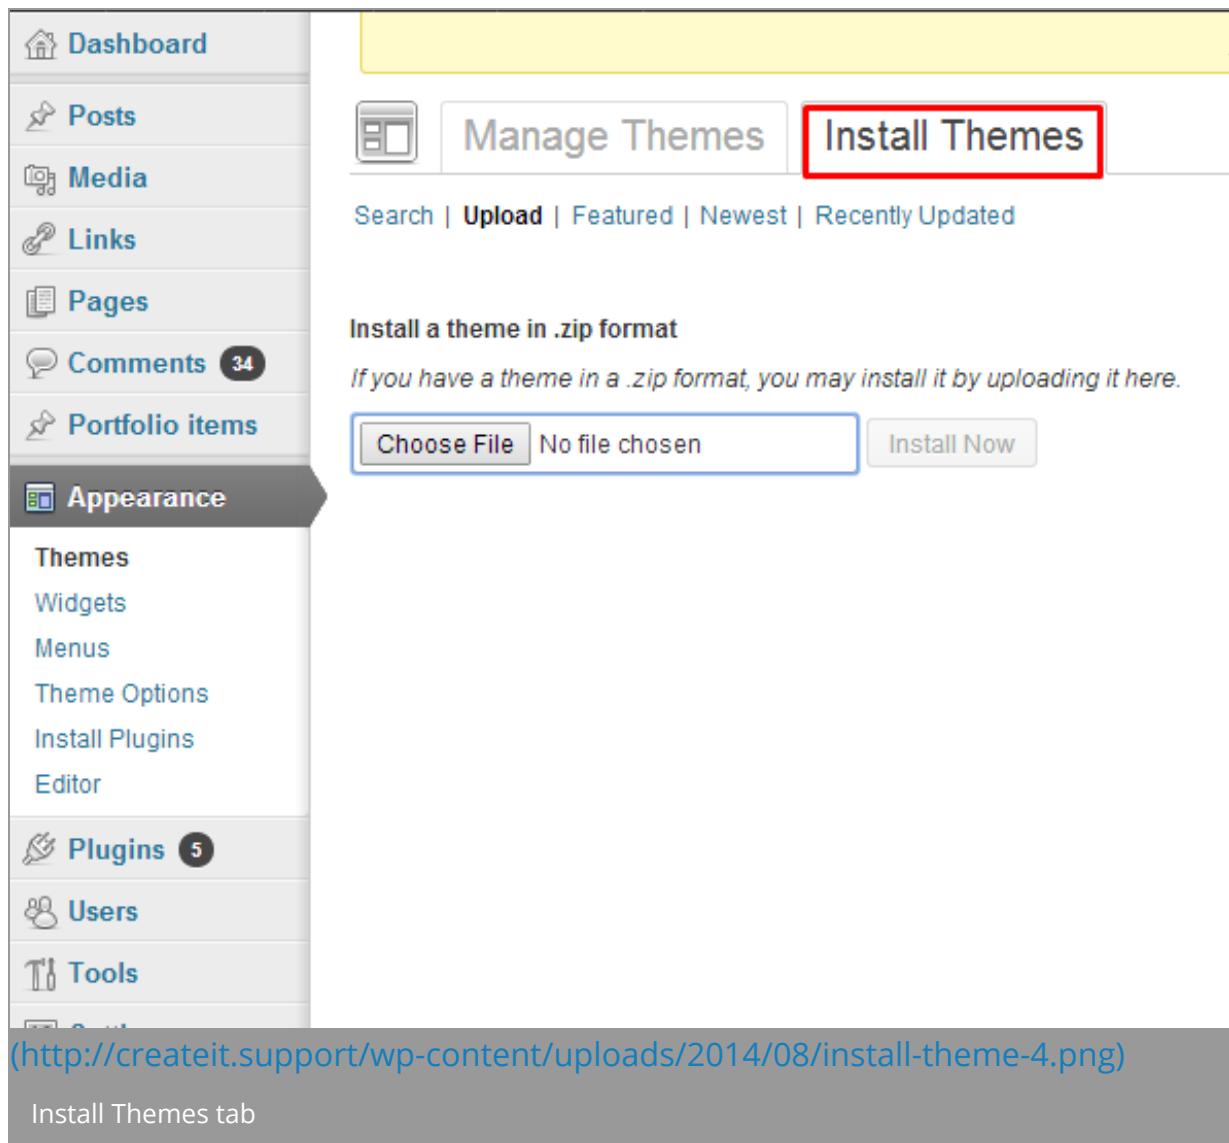

Once you logged into your administration panel go to *Appearance > Themes*. Depending on your version of WordPress you will see there button *Add New* or 2 tabs: *Manage Themes* and *Install Themes*.

The screenshot shows the WordPress Pluto dashboard. On the left sidebar, under the Appearance section, the 'Themes' option is highlighted with a red box. The main content area displays a welcome message: 'Welcome to WordPress! We've assembled some links to get you started:'. It includes a 'Get Started' button, a link to 'Customize Your Site', and another link to 'or, change your theme completely'. To the right, there's a 'Next Steps' section with links to edit front pages, add additional pages, add a blog post, and view the site. Below these sections, there's a sidebar with links for 'Customize', 'Widgets', 'Menus', 'Custom sidebars', 'Theme Options', 'Install Plugins', 'Header', and 'Background'. A note says 'Using Pluto theme.' and there are statistics: '57 Pages', '4 in moderation', and a link to 'See 3 more...'. At the bottom of the sidebar, it says '(http://createit.support/wp-content/uploads/2014/08/install-ftp-1.png)'.

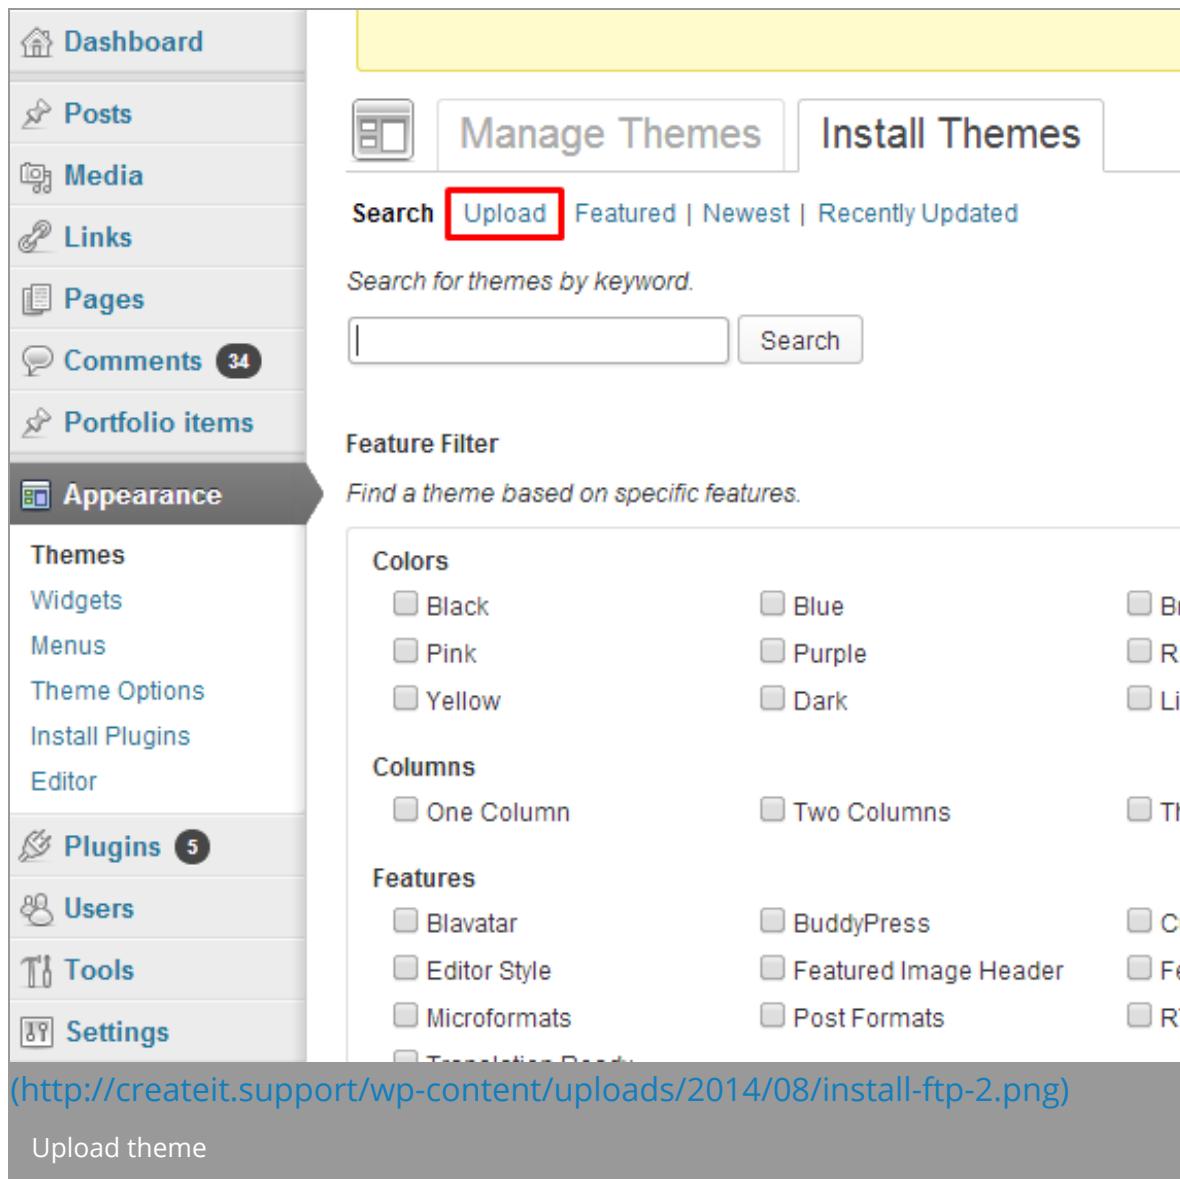

Here (http://codex.wordpress.org/Using_Themes) you will find instructions how to proceed with 3.9.0 and lower versions of WordPress.

If you are using newer version follow steps below to install the theme:

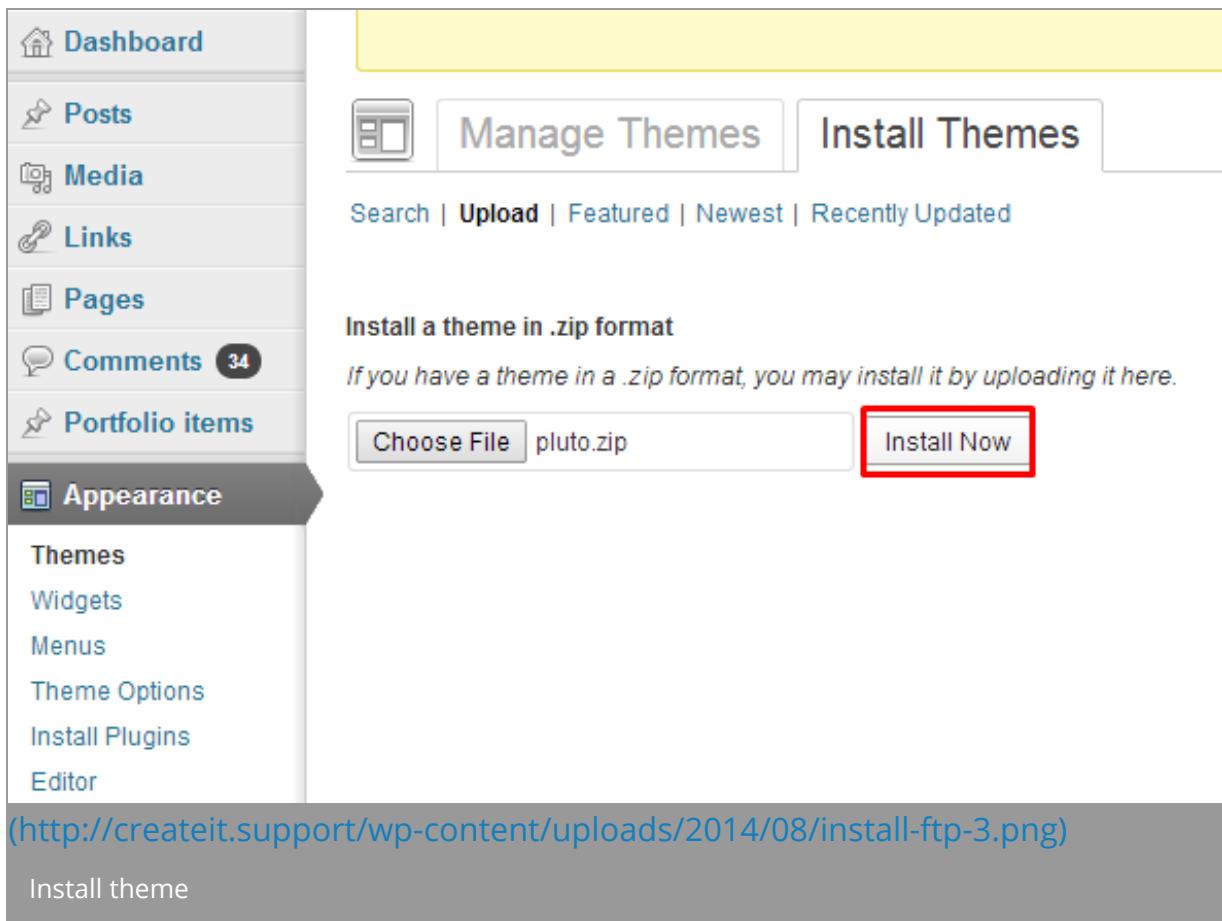

- **Step 1** – click on *Install Themes* tab

- **Step 2** – choose *Upload* option to upload zip file

- **Step 3** – choose **burger.zip** from you computer.
- **Step 4** – once file is chosen click *Install Now*

Common Install Error: Are You Sure You Want To Do This?

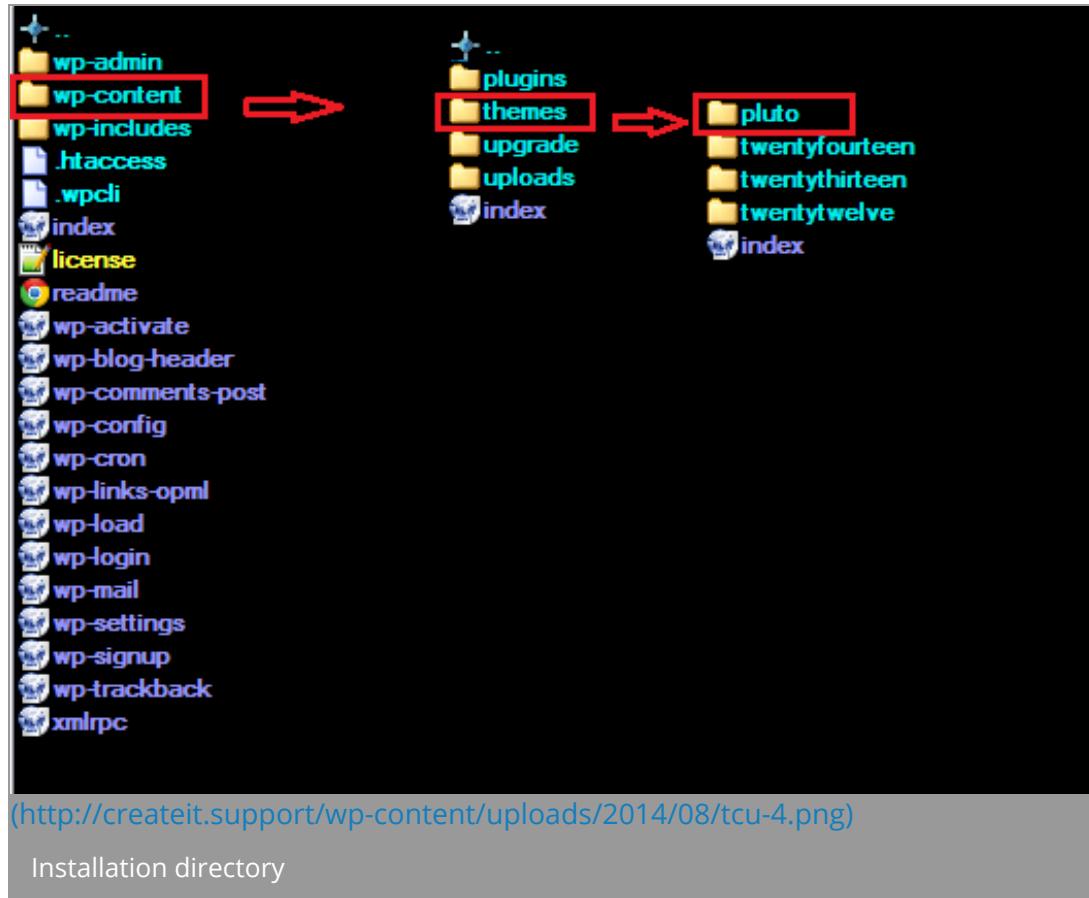

If you get the *Are You Sure You Want To Do This* message when installing Food Truck.zip file via WordPress, it means you have an upload file size limit. [Install the theme via FTP](#) if this happens, or call your hosting company and ask them to increase the limit.

2.2 Installation via FTP

To install Food Truck via FTP follow step below:

- **Step 1** – Unarchive burger.zip file
- **Step 2** – Access your host web server using FTP client

- **Step 3** – Find directory *wp-content > themes*
- **Step 4** – Put folder Food Truck in directory *wp-content > themes*

Learn more:

[WordPress codex – FTP clients \(\[http://codex.wordpress.org/FTP_Clients\]\(http://codex.wordpress.org/FTP_Clients\)\)](http://codex.wordpress.org/FTP_Clients)

2.3 Import demo content

The fastest and easiest way to import our demo content is to use our Theme Options **1-click Demo Importer**. Our importer will import all pages and posts, several sample sliders, widgets, theme options, assigned pages, and more. We recommend this approach on newly installed, fresh WordPress installation. It will **not replace** content like posts, pages, portfolio, etc , it will not delete current

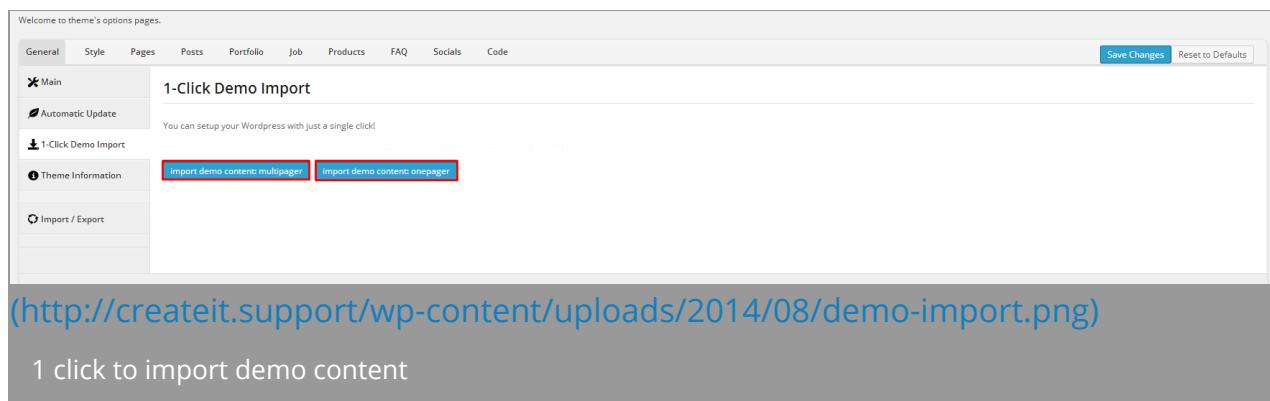

menus but configure our demo menus, it will replace theme options. So if you have created posts, pages or portfolio content before import, there is no need to be afraid of losing them.

To import our demo content, please see the steps below:

- **Step 1 (optional)** – install and activate these plugins before you proceed: Revolution Slider, WooCommerce. Without activation those plugins some functions could not work like on our demo page.
- **Step 2** – setup Media thumbnails sizes in *Settings > Media* to our recommended values:
 - Thumbnail size: 150 x 150px
 - Medium size: 300 x 300px
 - Large size: 1024 x 1024px

If you are using WooCommerce product images sizes in *WooCommerce > Settings > Products*

- **Step 3** – navigate to *Appearance > Theme Options > General – 1-click Demo Import*
- **Step 4** – click the *Import demo content* button with multipage or onepager version.

- **Step 5** – it can take a few minutes to import everything. Please be patient and wait for it to complete. Once it loads, you will see message indicating success.

Learn more:

3. Pages

You can use Pages to organize and manage any content on your website. You can create multiple pages on your website for different types of content or setup onepager with scroll-to-section menu.

3.1 Create pages

To create a new Page follow the steps below:

- **Step 1** – select *Pages > Add New*
- **Step 2** – add Title
- **Step 3** – add content – we recommend you to create page content using [shortcode generator](#) (<http://createit.support/knowledgebase/what-is-a-shortcode/>) or by modifying [demo content](#) (<http://createit.support/pluto-documentation/#doc-4502>)
- **Step 4** – choose page attributes:
 - Parent – if you want to create subpage
 - Template – you can choose one of defined page templates: Archives, Author, Image, Faq Template, Left or Right Sidebar and Default Template
 - Page order
- **Step 5** – choose template settings
- **Step 6** – click Publish to make your page public.

3.2 Onepager setup

Food Truck has the ability for you to make a one page site with a scrolling to sections menu. Most sites are traditionally setup with individual pages, each page with its own content. A one page site allows you to put all the content on one page, and the menu items will link to each different section of the page. Think of it as a full site but all on one page. Please read below for information on how to set this up.

Create A New Page With Your Content And Anchor Points

- **Step 1** – Navigate to the *Pages* section of your admin and click *Add New*.
- **Step 2** – Create page with all sections. Each section should begin with [chapter] shortcode or any other html element with unique id, for example :

```
1 [chapter id="work"]
2 (...) content (...)

4 [chapter id="services"]
5 (...) content (...)

6 [chapter id="about"]
7 (...) content (...)
```

- **Step 3** – In *Appearance > Menus* create new main menu (using *Custom Links* option), where URL will be section id with “/#” sign, for example : /#services or /#about.

Pages

Links

URL: /#about

Link Text: About

Add to Menu

Categories

Menu Name: single page menu

Menu Structure

Drag each item into the order you want.

Start

URL: /#start

Navigation Label: Start

Move: Down one

Remove | Cancel

About

Portfolio

Blog

Contact

(<http://createit.support/wp-content/uploads/2014/08/onepager-2.png>)

Add new menu item

The screenshot shows the WordPress menu editor interface. A single menu item is selected, labeled "Start". The "URL" field contains "/#start". The "Navigation Label" field also contains "Start". There is a "Title Attribute" field which is currently empty. Below the menu item, there are buttons for "Move Down one", "Remove", and "Cancel". At the bottom of the editor, there is a link to the screenshot source: "(http://createit.support/wp-content/uploads/2014/08/onepager-setup.png)".

Item details

And your onepager menu is ready. Remember to choose Theme Location *Primary Navigation* to your menu.

3.3 Homepage setup

If you added some pages via *Pages > Add new* you can choose one and set it up as homepage. Use *Appearance > Theme Options > Pages* and choose from the list your homepage. Remember to click *Save changes* at the end of editing

The screenshot shows the "Theme Options" page in the WordPress admin, specifically the "Pages" tab. Under the "Home" section, there is a dropdown menu labeled "Home page" with the value "Home". This dropdown is highlighted with a red border. Below it are other settings: "Show titles on pages" (dropdown "Show"), "Show breadcrumbs on pages" (dropdown "Show"), "Comments" (dropdown "Hide"), and "Comment form" (dropdown "Hide"). At the top right of the page are "Save Changes" and "Reset to Defaults" buttons. At the bottom left is the "CREATE IT" logo. At the very bottom of the screenshot, there is a link to the screenshot source: "(http://createit.support/wp-content/uploads/2013/03/homepage-old.png)".

3.4 Pages Theme Options

To create a standardized template for each page some of the settings you can set globally. You need to go to *Appearance > Theme Options > Pages* and choose from several options:

The screenshot shows the 'Pages' tab selected in the top navigation bar of the theme options. On the left, there's a sidebar with a house icon labeled 'Home'. The main area displays four configuration sections, each with a 'Show' dropdown menu:

- Show titles on pages**: Set to 'Show'.
- Show breadcrumbs on pages**: Set to 'Show'.
- Comments**: Set to 'Show'.
- Comment form**: Set to 'Show'.

At the bottom, there's a footer section with the 'THEME WOODMEN' logo and a link to 'Online documentation'.

(<http://createit.support/wp-content/uploads/2014/08/pages-theme-options.png>)

Pages Theme Options

You can change the following settings:

- show title on pages
- show breadcrumbs on pages
- show comments
- show comment form

4. Navigation Menu

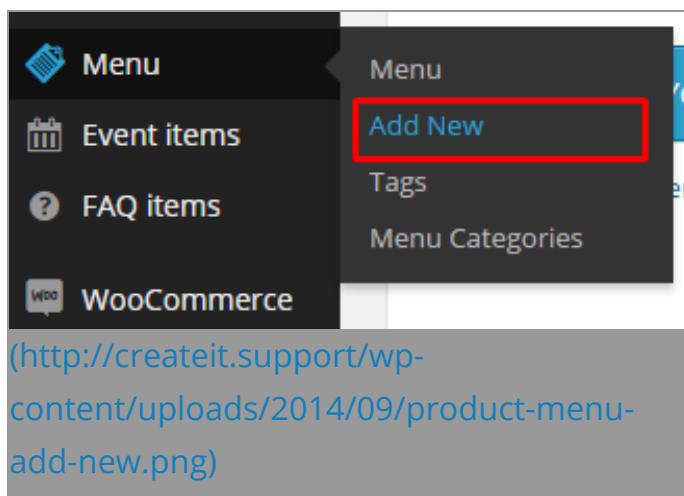

5. Menu Products

Food Truck is dedicated for restaurants and food truck owners. That's why the most important section here are Menu Products. You can easily add here new dishes, that you serve in your place. Group them using tags, categories and display anywhere in your page content.

5.1 Creating menu products

Follow the steps below to create a Menu Product items

- **Step 1** – navigate to Menu in your WordPress admin.

Add new menu product

- **Step 2** – click on *Add New* to make a new product. Create a title and insert your description.
- **Step 3** – add image via *Featured Image*
- **Step 4** – set product price, currency and postscript in *Menu item setting*

Menu item settings

Price:

Product price

Currency:

Product currency. Default value can be changed in Appearance - Theme Options - Products tab

Postscript:

Smaller text below product description

(<http://createit.support/wp-content/uploads/2014/09/menu-item-settings.png>)

Menu item settings

- **Step 5** – add menu categories, tags and order (optional) – on the right hand side of Menu edition page.
- **Step 6** – click *Publish* to save your settings

For every menu item you can define:

1. Product Tags
2. Product Categories
3. Price
4. Currency
5. Postscript – a small text below product description (e.g. *contains nuts)
6. Featured image
7. Product thumbnail image – Multiple Featured Images plugin must be activated

5.2 Menu shortcodes

Once your menu items are created you can display them in your page using [Menu shortcodes](#) (createit.support/knowledgebase/what-is-a-shortcode/).

The screenshot shows the WordPress visual editor interface. The top bar has a 'shortcodes' tab selected. A dropdown menu is open from the 'shortcodes' tab, showing various shortcode categories: Accordion, Audio, Bars, Boxes, Buttons, Chapter, Contact, Events, Gallery, Images, Posts, Sliders, Structure, Tabs, Testimonials, Typography, Video, Woocommerce, and Shortcodes. The 'Menu' option is highlighted with a red box. The main content area contains some sample code and a word count of 147. Below the editor, there are template settings for showing titles and page titles, and options for showing breadcrumbs.

Menu shortcodes

Make it easy

Add some products and then try to paste code below on any page. It will display your newly added items.

- by `[products tag="recommended" limit="3"]` - 3 product items with tag "recommended" will be displayed.

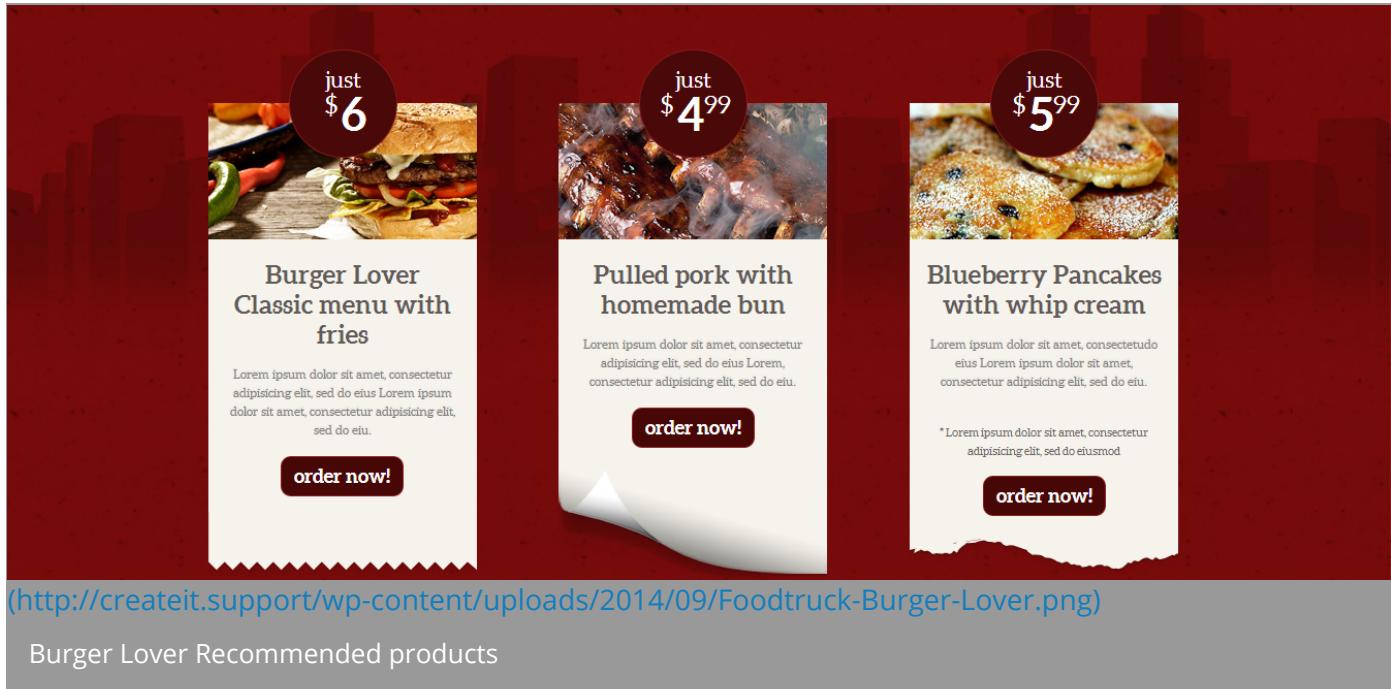

Products will have custom look and feel for every active theme. Please note that products need to have a tag

“recommended”

- by [cat_name="starters"] display every item with assigned category “starters”.

EXAMPLES:

Burger Lover items with tag “recommended”:

Seabreeze items with tag “recommended”:

Shell Plate

*Lorem ipsum dolor sit amet,

6. Portfolio

The theme comes with a custom post type for portfolio. Portfolio pages configuration is described in Options section.

6.1 Creating portfolio items

Food Truck is loaded with several options for displaying portfolio items. It offers many different options for you to present your portfolio. In addition there are numerous theme options and shortcodes options that allow you to customize how portfolio is displayed.

But first, you need to create your portfolio items. To do that, please follow the steps below:

- **Step 1** – navigate to *Portfolio items* and click *Add New*
- **Step 2** – create Portfolio Item title and content – you can use [Food Truck shortcodes](http://createit.support/knowledgebase/what-is-a-shortcode/) (<http://createit.support/knowledgebase/what-is-a-shortcode/>) to build content
- **Step 3** – add Tags from the right side.

- **Step 4** – add Categories from the right side. To assign it to the post, check the box next to the Category name.
- **Step 5** – set portfolio item order number if you want to display your portfolio item in a specific order
- **Step 6** – choose featured image in Featured Image box
- **Step 7** – set as many *Portfolio settings* as you want
- **Step 8** – click *Publish* to save portfolio item

Learn more:

How to add multiple images to portfolio gallery? (<http://createit.support/knowledgebase/how-to-add-multiple-images-to-portfolio-item-gallery/>)

6.2 Portfolio index page

One of the ways of displaying portfolio items is to setup portfolio page. All of your portfolio items will be displayed there, ordered by publish date.

To set the page as your portfolio index page, navigate to *Appearance > Theme Options – Portfolio* and choose Portfolio index page from pages, that you created.

Notice:

On portfolio index you can display only portfolio items. If you will try to add any content to that page it will not be displayed.

6.3 Portfolio Theme Options

Food Truck includes a highly advanced theme options panel organized into sections that allows users to customize many different aspects of the theme. There is a Portfolio section of theme options that allows you to customize different aspects of the portfolio items; the date formats, single post page settings, and so much more. The posts tab is organized into 2 sections; General Portfolio Options, Single Portfolio Options. See the information below for a description and screenshot of each section.

- **General** portfolio options – these are mainly for the assigned portfolio index page because the portfolio shortcode has many of them built in. However some do apply.
- **Portfolio item** options – these options all apply to the single portfolio page, not the main index page. They apply for both assigned portfolio page, or the portfolio shortcode.

6.4 Portfolio shortcodes

If you want to display your portfolio items in more places than portfolio index page – you can do it in several ways by *Portfolio shortcodes*.

The screenshot shows a WordPress editor interface. At the top, there's a toolbar with various buttons: b, i, link, b-quote, del, ins, img, ul, ol, li, code, more, close tags, shortcodes, and fullscreen. Below the toolbar, a code block contains the following shortcode:

```
[chapter background="1"]
[works limit="8" filters="true" columns="4" lightbox="true"]
[/chapter]
```

To the right of the code block is a vertical sidebar with a list of shortcodes. A red box highlights the "Portfolio" section, which includes four items: "Featured Work", "Related Projects", "Works", and "Works slider".

(http://createit.support/wp-content/uploads/2014/08/portfolio_shortcodes.png)

Portfolio shortcodes

Every shortcode goes with several parameters, that allows you to sort or filter items in a few ways. On the following screenshots you can find part of available options.

Full of possibilities you can find on our demo page – you can preview parameters that we used after importing [demo content](#) (<http://createit.support/pluto-documentation/#doc-4502>). You can also use shortcode generator and use as much *Advanced filter options* as you want.

7. Blog

Food Truck is loaded with options for the blog. It offers many different options for you to present your blog posts, along with several different blog posts layouts. In addition there are numerous theme options and shortcode options that allow you to customize how posts are displayed.

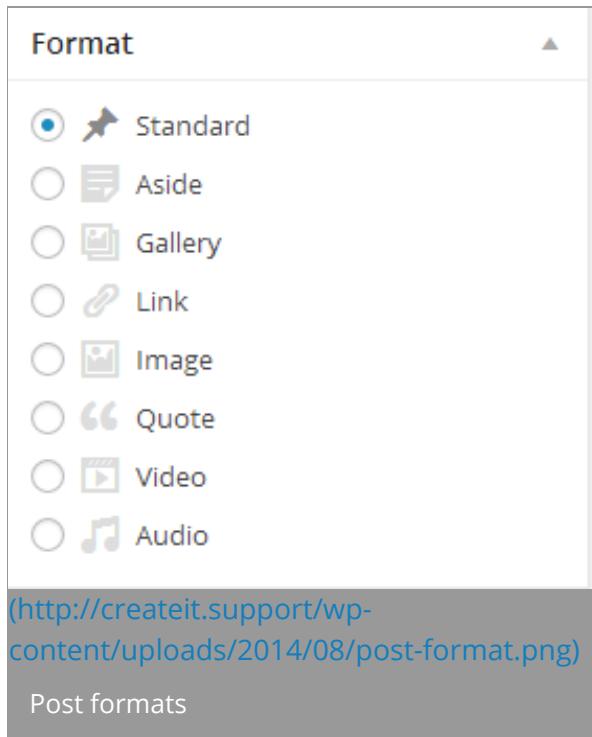

There are several ways to display your blog posts, we will cover each method as well as describe blog post types, post options and theme options. The following sections will cover each of these aspects of the blog.

7.1 Creating blog posts

No matter which method you use to display your blog posts, the first thing you need to do is create the blog posts.

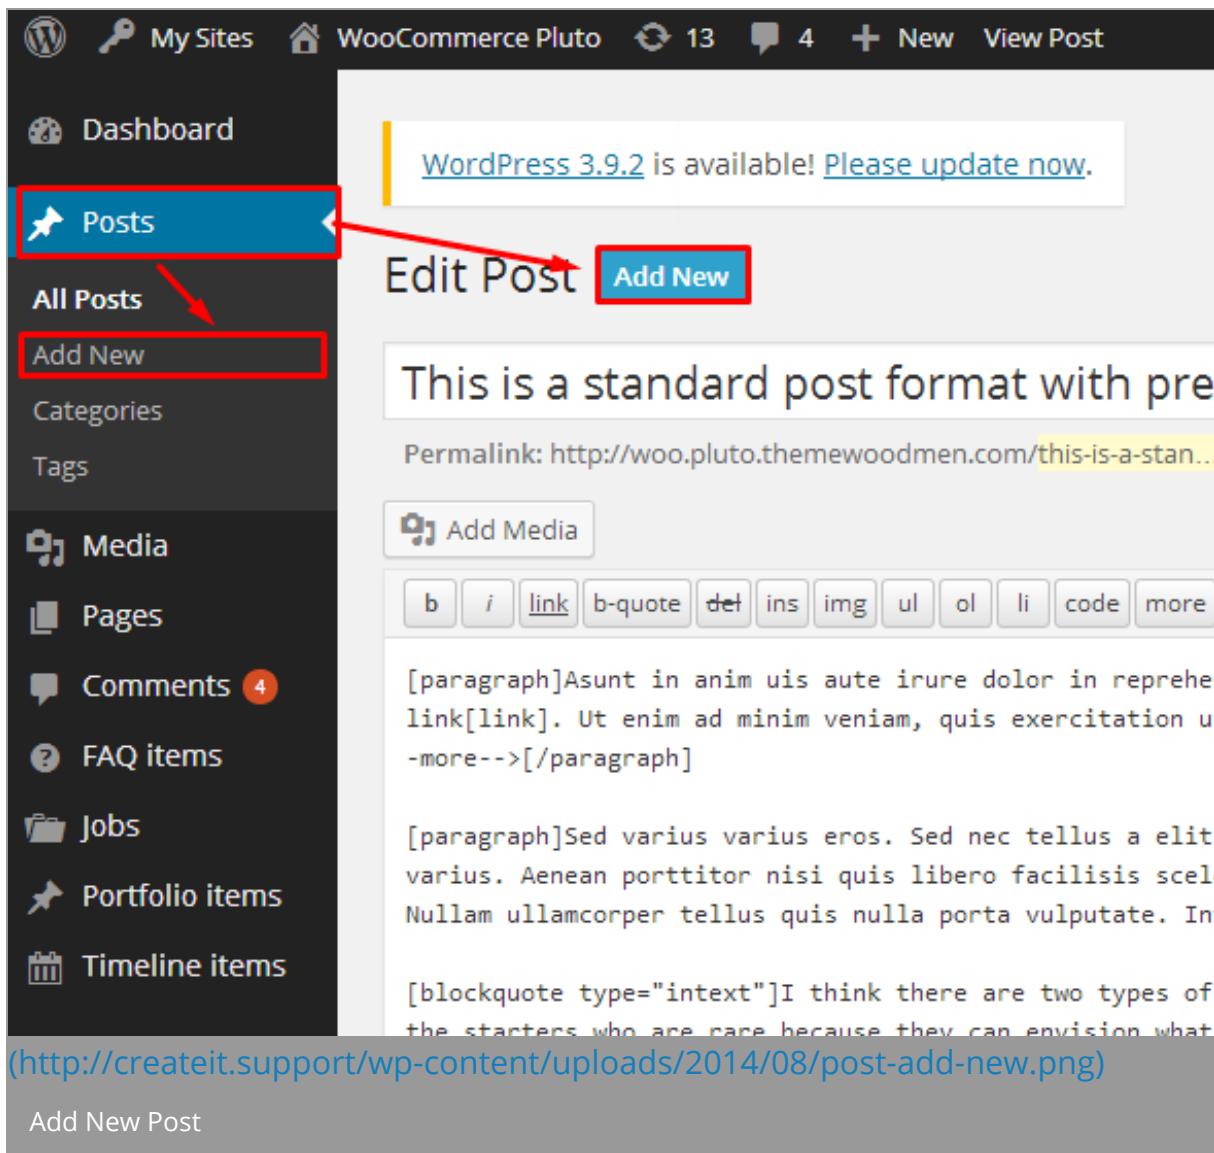

Food Truck offers several blog post types:

- Standard
- Aside
- Gallery
- Link
- Image
- Quote
- Video
- Audio

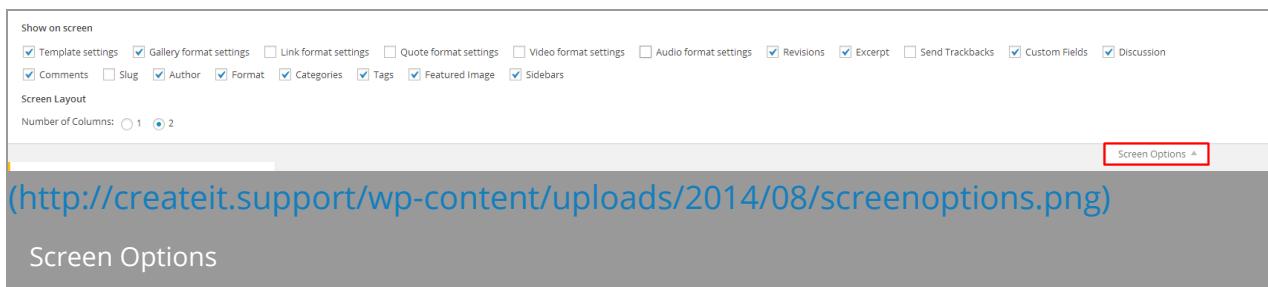

Follow the steps below to create a blog post

- **Step 1** – navigate to Posts in your WordPress admin.
- **Step 2** – click on *Add New* to make a new post. Create a title and insert your post content in the editing field. You can use any of our [shortcode](#) (<http://createit.support/knowledgebase/what-is-a-shortcode/>) elements inside the post.

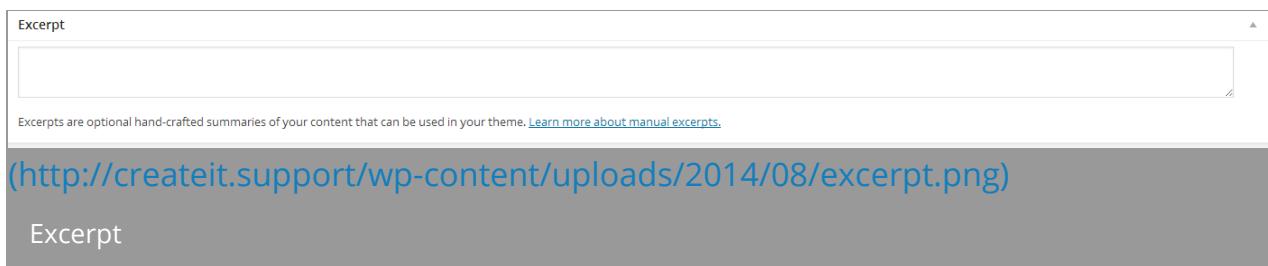

If you want to use some additional fields, choose them from screen options at the top of the screen.

- **Step 3** – add Categories from the right side. To assign it to the post, check the box next to the Category name.
- **Step 4** – add Tags from the right side. Type the name of the tag in the field, separate multiple tags with commas.

- **Step 5** – for a single image, click the Featured Image box, select an image and click *Set Featured Image*.
- **Step 6** – for a Gallery, insert more than one Featured Image, each image will be a slide in the gallery slideshow. Slides will be ordered by the date when the images were added to *Media*
- **Step 7** – for a video post, paste the iFrame embed into the Video Embed Code field, file url to M4V file url or OGV File URL or Direct video url from Youtube, Vimeo or Dailymotion
- **Step 8** – create an excerpt – Excerpts are optional hand-crafted summaries of your content that can be used in your theme. [Learn more about manual excerpts](http://codex.wordpress.org/Excerpt) (<http://codex.wordpress.org/Excerpt>)

- **Step 9** – once you finished, click Publish to save the post.

7.2 Blog index page

The most popular way of displaying blog posts is to setup blog index page. All of your posts will be displayed there, ordered by publish date.

To set the page as your post page, navigate to *Appearance > Theme Options > Posts* and choose Blog index page from pages, that you created.

Choose blog index page

Notice:

On Blog index page will be displayed only posts, so don't add any other content to it.

7.3 Blog Theme Options

When using the assigned blog page as described above, all the options you can select for it are located in *Appearance > Theme Options* on the *Posts* tab. There are dozens of options to choose from like layout, categories, dates, etc. There are general blog options and single post page options. Each one has title and descriptions to help you better understand what they do. Any type of blog options you need to set will be set here in theme options when using the assigned blog page.

- Index – these are mainly for the assigned blog page, you change here:

7.4 Recent Post Shortcode

The second blog method we cover is our custom recent post shortcode. This shortcode is unique in that it offers more compact design options that may work better on pages with other content. This short code is a fantastic method because it allows you to place your blog posts on any page, assign custom categories to display and so much more. You can use the short code as many times as you'd like, and on any page or post.

Below you can see how Recent Post shortcode will be displayed on your page:

RECENT POSTS

Recent posts shortcode

8. Shortcodes

8.1 Using shortcodes

Food Truck is build with [shortcodes](#)

(<http://createit.support/knowledgebase/what-is-a-shortcode/>). Shortcode is a WordPress-specific code that lets you do nifty things with very little effort.

Shortcodes can embed files or create objects that would normally require lots of complicated, ugly code in just one line. **Shortcode = shortcut.**

You don't have to know **Shortcodes** list, syntax or available parameters, if you decide to create your website content using shortcode generator, which you can find in your window toolbar. Generator allows you to simply put your images, text and other content to input fields and choose displaying options from self-explanatory boxes.

In [shortcode generator \(<http://createit.support/knowledgebase/what-is-a-shortcode/>\)](http://createit.support/knowledgebase/what-is-a-shortcode/) you will find shortcode for any page content element that you can see on demo page.

Below you will find description for few basic shortcodes types, which should give you an idea of the shortcodes possibilities.

Structure

Page structure elements: columns, rows, spacers are shortcodes – check *Structure* section with shortcodes, which help you to create your [page grid \(<http://getbootstrap.com/examples/grid/>\)](http://getbootstrap.com/examples/grid/). Layout generator can be very useful here.

close tags shortcodes

 - 2/3 column

(<http://createit.support/wp-content/uploads/2014/08/layout-generator.png>)

Layout generator

Typography

You want to add to your page sections headers, blockquotes, list or simply link? In section *Typography* you will find all options available in Food Truck to format text elements.

Contact

If you want to put any element to let your users contact or follow you or your profile inside your page content, you will find that in *Contact* shortcode section. You can easily configure and put anywhere on your page elements like: Google Map, Contact form, Newsletter Form, Socials buttons.

Sliders

Our themes come with several types of sliders. You can see preview for them on demo page. All available sliders are always in *Sliders* section in shortcode generator.

In shortcode generator you can find also several types for buttons, boxes, portfolio items, bars and other elements. We encourage you to experiment with all available options.

9. Widgets

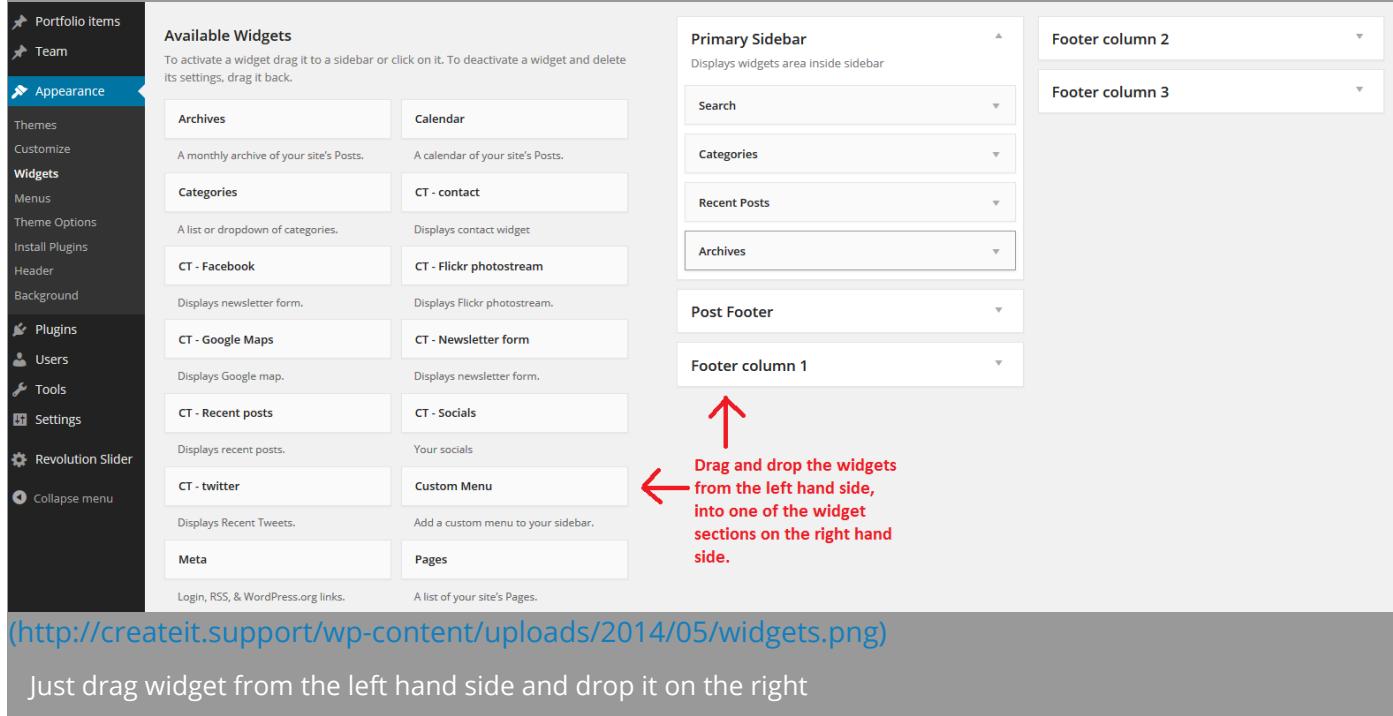

9.1 Using widgets

Widgets are small blocks of content, which you can find in theme footer or sidebar. They were originally designed to provide a simple and easy-to-use way of giving design and structure control of the WordPress Theme to the user, which is now available on WordPress Themes to include the header, footer, and elsewhere in the WordPress design and structure. Widgets require no code experience or expertise. They can be added, removed, and rearranged on the WordPress Administration *Appearance > Widgets* panel.

Just drag and drop the widgets you want, into the right hand side where your sidebars and footer widgets are listed. Simply drag your widgets over to the sidebar or footer column, and then populate the content.

There are various fields and settings you can choose for each individual widget

and all are self explanatory. You can also use multiple widgets per footer column, just drag and drop them into place. And you can put as many widgets as you want inside sidebar. Once you have finished populating the widgets, always make sure to hit the *Save* button to save the settings.

10. Plugins

Some functionalities of the Food Truck are available because of plugins we used to create it. Once Food Truck is activated in your WordPress admin panel you should see notification about bundled plugins we recommend to install – they are included in Food Truck package – so you don't have to do nothing more than click *install* and *activate*.

Notice:

We can't guarantee Food Truck compatibility with third party plugins. If you want to avoid unexpected bugs and errors use as little plugins as possible.

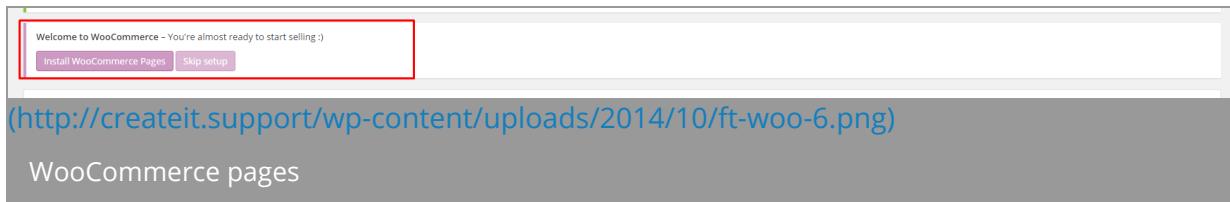

Below you will find the list of plugins we recommend you to use with Food Truck.

10.1 WooCommerce

Installation

1. Activate plugin "WooCommerce"

After activation you will see notification about installing WooCommerce pages:

Click on *Install* to import following WooCommerce pages:

- My Account
- Checkout
- Cart
- Shop

2. Configure [WooCommerce settings](http://docs.woothemes.com/document/configuring-woocommerce-settings/) (<http://docs.woothemes.com/document/configuring-woocommerce-settings/>)
3. Learn more about [WooCommerce](http://docs.woothemes.com/documentation/plugins/woocommerce/woocommerce-codex/)
(<http://docs.woothemes.com/documentation/plugins/woocommerce/woocommerce-codex/>)
 - **Step 1 – add products**
(<http://docs.woothemes.com/document/managing-products/>)
 - **Step 2 – setup your products**
(<http://docs.woothemes.com/documentation/plugins/woocommerce/getting-started/setup-products/>)
 - **Step 3 – sell what you've got**
(<http://docs.woothemes.com/documentation/plugins/woocommerce/getting-started/sell-products/>)
 - **Step 4 – setup shipping options**
(<http://docs.woothemes.com/documentation/plugins/woocommerce/getting-started/shipping-options/>)

started/shipping/)

- **Step 5 – manage your orders**

(<http://docs.woothemes.com/documentation/plugins/woocommerce/getting-started/managing-orders/>)

Translation

WooCommerce plugin can be translated to any language. **Here** (<http://docs.woothemes.com/document/woocommerce-localization/>) you can find instructions how to do that.

10.2 WooCommerce for Food Truck

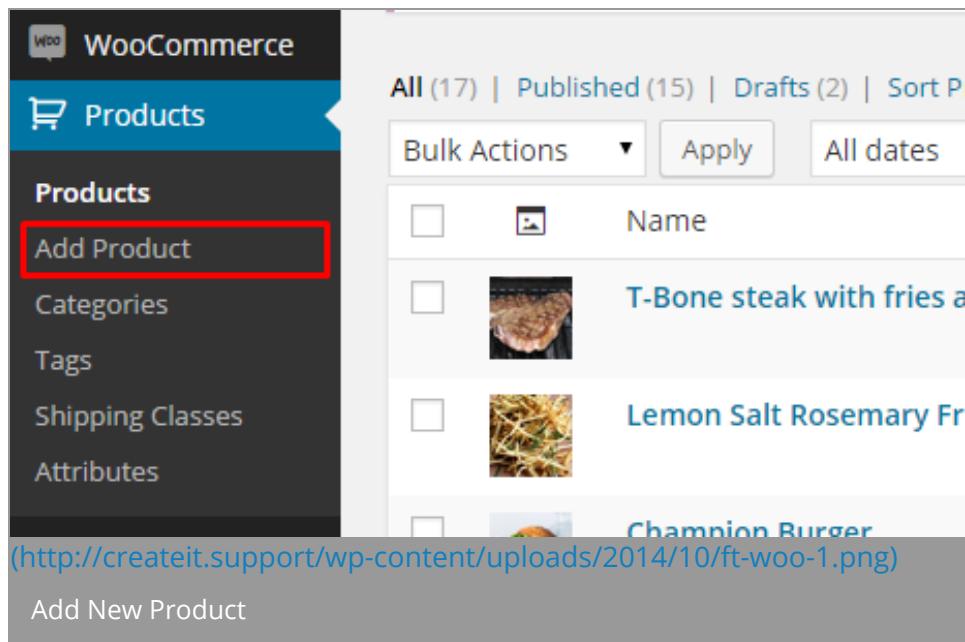

Notice:

If you were using Food Truck version 2.8 or lower – you will notice some structure changes due to WooCommerce products. You will find your products under the **Menu** name in your sidebar menu in admin panel as well as in shortcodes. All of your created before products will be saved with all their settings, but under new name – **Menu**.

Products are now only WooCommerce products.

WooCommerce Products

You can add WooCommerce Product via *Products > Add Product*

The screenshot shows the WooCommerce admin interface under the 'Products' menu. On the left sidebar, 'Add Product' is highlighted with a red box. The main area displays a list of products with columns for Name, Image, and Description. The first product listed is 'T-Bone steak with fries a' with an image of a steak. The second product is 'Lemon Salt Rosemary Fr' with an image of a dish. The third product is 'Champion Burger' with an image of a burger. At the top, there are buttons for Bulk Actions, Apply, and All dates, along with links for All (17), Published (15), Drafts (2), and Sort P.

You can use Simple Product option and add only basic information:

1. Product Name
2. Description
3. Category
4. Tag
5. Stock keeping unit
6. Regular Price
7. Sale Price
8. Product short description
9. Product gallery
10. Product feature image

The screenshot shows the WooCommerce Product Editor for a product named "T-Bone steak with fries and homemade sauce".

- General Tab:** Shows the product title and a rich text editor with a red box around it. A status bar at the top right indicates "Published" and "Status: Published".
- Product Data Tab:** Set to "Simple product". Fields include SKU (5), Regular Price (6) set to 14.95, Sale Price (7) set to 0, and Sale Price Date.
- Custom Fields Tab:** Contains a "Product Short Description" field with placeholder text and a rich text editor.
- Sidebar Options:**
 - Product Categories:** Shows categories like Beverage, Burger, Dessert, Side Dish, and Starters. A red box highlights the "Most Used" section.
 - Product Tags:** A red box highlights the "Choose from the most used Product Tags" link.
 - Sidebars:** A note says there are no replaceable sidebars selected.
 - Product Gallery:** Shows a thumbnail image and a "Add product gallery images" button.
 - Featured Image:** Shows a black placeholder image.

(http://createit.support/wp-content/uploads/2014/10/ft-woo-2.png)

Product general settings

Variable Product

You can also use more advanced product settings, and show available product variables. To use that option create product Attributes first.

The screenshot shows the WooCommerce Product Attributes page.

- Add New Attribute:** A red box highlights the "Add New Attribute" button.
- Attribute Table:** Shows five attributes with their details:

Name	Slug	Type	Order by	Terms
Bun	bun	Select	Custom ordering	Brioche, Ciabatta, Potato, Torta roll, White bun with sesame seeds
Topping	topping	Select	Custom ordering	Cheddar and Bottled Barbecue Sauce, Chimichurri Sauce, Feta and Fresh Dill, Sliced Tomato, Spiced Tomato Chutney
Sauce	sauce	Select	Custom ordering	Chili Sauce, Curry Mayo, Herbed Mayo, Ketchup, Sriracha Sauce, Yellow Mustard, Zest and Zing
Meat	meat	Select	Custom ordering	Beef, Chicken, Fish, Pork, Vegi

(http://createit.support/wp-content/uploads/2014/10/ft-woo-3.png)

Product attributes

To every attribute assign its terms, which you will use to create product variations.

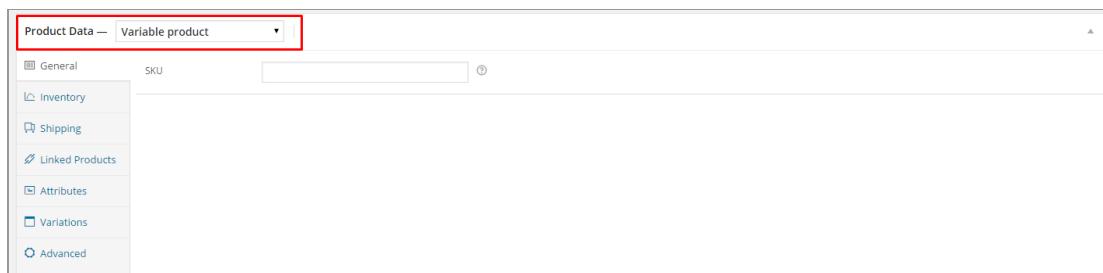

Name	Slug	Type	Order by	Terms	
Bun	bun	Select	Custom ordering	Brioche, Ciabatta, Potato, Torta roll, White bun, Whole wheat bun, Sesame seeds	Configure terms 
Edit Delete					
Topping	topping	Select	Custom ordering	Cheddar and Bottled Barbecue Sauce, Chimichurri Sauce, Feta and Fresh Dill, Sliced Tomato, Spiced Tomato Chutney	
Sauce	sauce	Select	Custom ordering	Chili Sause, Curry Mayo, Herbed Mayo, Ketchup, Sriracha Sause, Yellow Mustard, Zest and Zing	
Meat	meat	Select	Custom ordering	Beef, Chicken, Fish, Pork, Vegi	

(<http://createit.support/wp-content/uploads/2014/10/ft-woo-4.png>)

Attributes terms

Once you have attributes and terms, you can go to product item edition to create product variations.

1. Choose from product data *Variable Product*

(<http://createit.support/wp-content/uploads/2014/10/variable-1.png>)

Variable product

2. Go to *Attributes* tab and select your attributes

(<http://createit.support/wp-content/uploads/2014/10/variable-2.png>)

Product attributes

3. Add product variations and click *Link all variations* once you finished

(http://createit.support/wp-content/uploads/2014/10/variable-3.png)

Setup variations

4. Customize your product variation by expanding variation tab – you can add here variation image, dimensions, weight, price, status and shipping class

(http://createit.support/wp-content/uploads/2014/10/variable-4.png)

5. Remember to save changes once you finished product edition – now you can check how your product looks like:

Variable product

Add products to Shop page

Once your products are created you can add them to your website. Setup your products index page via *WooCommerce > Settings > Products*

This screenshot shows the WooCommerce settings page in the WordPress admin area. The left sidebar has a red box around the 'WooCommerce' section, which contains links for Orders, Coupons, Reports, Settings (selected), System Status, Add-ons, Products, Appearance, Plugins, Users, Tools, and a Collapse menu. The main content area has a tab bar at the top with General, Products, Tax, Checkout, Shipping, Accounts, and Emails. The General tab is selected. A notice at the top says: 'This theme recommends the following plugin: *Multiple Featured Images*. The following recommended plugin is currently inactive: *Custom Sidebars (included)*.'. Below that are links to 'Begin installing plugin', 'Activate installed plugin', and 'Dismiss this notice'. Under 'Product Listings', there is a box with a red border containing the 'Shop' tab selected in a dropdown. Below it, a note says: 'The base page can also be used in your [product permalinks](#)'. Other sections include 'Shop Page Display' (Show products), 'Default Category Display' (Show products), 'Default Product Sorting' (Default sorting (custom ordering + name)), 'Add to cart' (checkboxes for Redirect to the cart page after successful addition and Enable AJAX add to cart buttons on archives), 'Product Data' (Weight Unit set to kg, Dimensions Unit set to cm), and 'Product Ratings' (checkbox for Enable ratings on reviews). At the bottom, a link leads to a screenshot of the WordPress editor showing the 'Shop' page content.

(http://createit.support/wp-content/uploads/2014/10/ft-woo-7.png)

Shop page

Or add your product elsewhere on the website using Shop Shortcodes:

This screenshot shows the WordPress editor for the 'Shop' page. The title 'Shop' is at the top, followed by a Permalink: http://ct7.pinky.createit/foodtruckwoo/shop/ and buttons for Edit, View Page, and Get Shortlink. The editor toolbar includes standard rich text tools like bold, italic, and lists. A red box highlights the inserter menu, which contains a list of shop-related shortcodes: Order tracking, Product price/cart button, Product by SKU>ID, Products by SKU>ID, Product categories, Products by category slug, Recent products, Featured products, and Shop Messages. To the right of the inserter menu, the Visual and Text tabs are shown, with the Text tab selected. The editor content area is mostly empty. At the bottom, there's a word count of 0, a 'Template settings' dropdown, and a note that it was last edited on October 6, 2014 at 1:14 pm. Below the editor is a link to another screenshot.

(http://createit.support/wp-content/uploads/2014/10/ft-woo8.png)

Products Listing Widgets

WooCommerce comes with several widgets dedicated to sort of filter your products. You can easily set them in Products Listing Sidebar, which is by default displayed on Shop page:

Sidebars

Products Listing
Widgets placed in this area will appear on Products Listing.

WooCommerce Layered Nav Filters: Filters

WooCommerce Product Categories: Sort by Category

WooCommerce Layered Nav: Filter by

WooCommerce Price Filter: Set your price limit

Single product bottom column 1

Single product bottom column 2

Primary Sidebar

Footer column 1

Footer column 2

Footer column 3

(<http://createit.support/wp-content/uploads/2014/10/ft-woo-9.png>)

Shop Widgets

Thanks to widgets your customers will be able to filter and sorting products:

Sort by Category

-  DESSERT
-  MAIN DISH
-  SIDE DISH
-  STARTERS

Sort by Ingredients

ARABICA	1
HOT CHOCOLATE	1
KAPE BARACO	1
LIBERICA	1
ROBUSTA	1

Set your price limit

Price: £4 — £12
Filter

Dessert
Apple Crumble with arabica sugar
£6.95

Starters
Best Arabica Blend with milk and caramel syrup
£11.95

Side Dish
Blueberry Muffin with cinnamon cream
£5.95
£4.87 Sale!

Main Dish
Coffee Special No. 01 with hazelnut milk
£7.95

How to disable WooCommerce?

If you don't want to use WooCommerce Shop and you are interested only in displaying your product in catalog mode just deactivate the plugin in *Plugins* section:

The screenshot shows the WordPress admin dashboard under the 'Plugins' section. The 'WooCommerce' plugin is selected, and its details are displayed. A red box highlights the 'Deactivate' button. A tooltip 'Deactivate this plugin' appears over the button. Below the main list, there is a note: 'Description'.

(<http://createit.support/wp-content/uploads/2014/10/ft-woo-11.png>)

Deactivate WooCommerce

Notice:

If you deactivate WooCommerce plugin – Shop shortcodes will no longer work.

11. Customization

Food Truck appearance, which you can see on our {demo-page} is only one of any available options. You have few options to customize it in the way you want except changing components appearance.

1. [Theme Customizer \(<http://createit.support/knowledgebase/how-can-i-customize-appearance-my-theme/>\)](http://createit.support/knowledgebase/how-can-i-customize-appearance-my-theme/) – navigate to *Appearance > Themes* and click *Customize* to open customization panel with options to change colors and backgrounds
2. Use [Custom CSS \(<http://createit.support/section/htmlcss-basics/>\)](http://createit.support/section/htmlcss-basics/)
3. Create your own [shortcodes](http://createit.support/knowledgebase/how-can-i-create-my-own-shortcode/) (<http://createit.support/knowledgebase/how-can-i-create-my-own-shortcode/>)

4. Contact us – we can create your website from scratch, redesign it or just extend existing one – just send us an mail to premium@createit.pl (<mailto:premium@createit.pl>)
